

EDGEWATER PARK JOINS SOLAR SIMPLIFIED TO REDUCE HOUSEHOLD ENERGY COSTS

If you are like me, you look for every opportunity to reduce your household's monthly costs. One of the biggest areas where we feel the pinch is our utility bills.

Recently, to help residents save on electricity costs, our Mayor and Committee partnered with **Solar**

Simplified, an approved Community Solar provider serving PSE&G customers.

Community Solar is part of a state-supported clean energy initiative that allows residents to benefit from solar energy without installing panels or switching their electric company. Through this program, PSE&G customers can subscribe to a nearby solar project and receive solar bill credits for the energy produced on their behalf.

These credits appear directly on the participant's regular PSE&G bill, reducing the amount owed each month. Participants are **guaranteed to save 45%** on the value of these solar credits, providing real monthly savings.

Participation is **free**, and enrollment is **month-to-month**. There are **no upfront costs, no credit checks, and no secondary bills**. The agreement can be **cancelled at any time without penalty**. Once enrolled, residents are automatically connected to an available solar farm in New Jersey and will start seeing solar credits appear on their PSE&G bill within a few billing cycles.

Residents will soon receive more information in the mail with details on how to enroll. Anyone ready to join or who has questions can **visit** www.SolarSimplified.com/edgewaterpark or **call Solar Simplified Customer Support at (888) 420-9831** for assistance.

The Mayor and Committee are excited to be able to extend this program by joining Solar Simplified and hope you will enroll and start reducing your electricity expenses.

With today's economy of ever-rising costs, it's refreshing to see that there is a program geared to cost savings for our residents.
